

Virtualization

2. Enterprise Software products manufactured by Enterprise organization

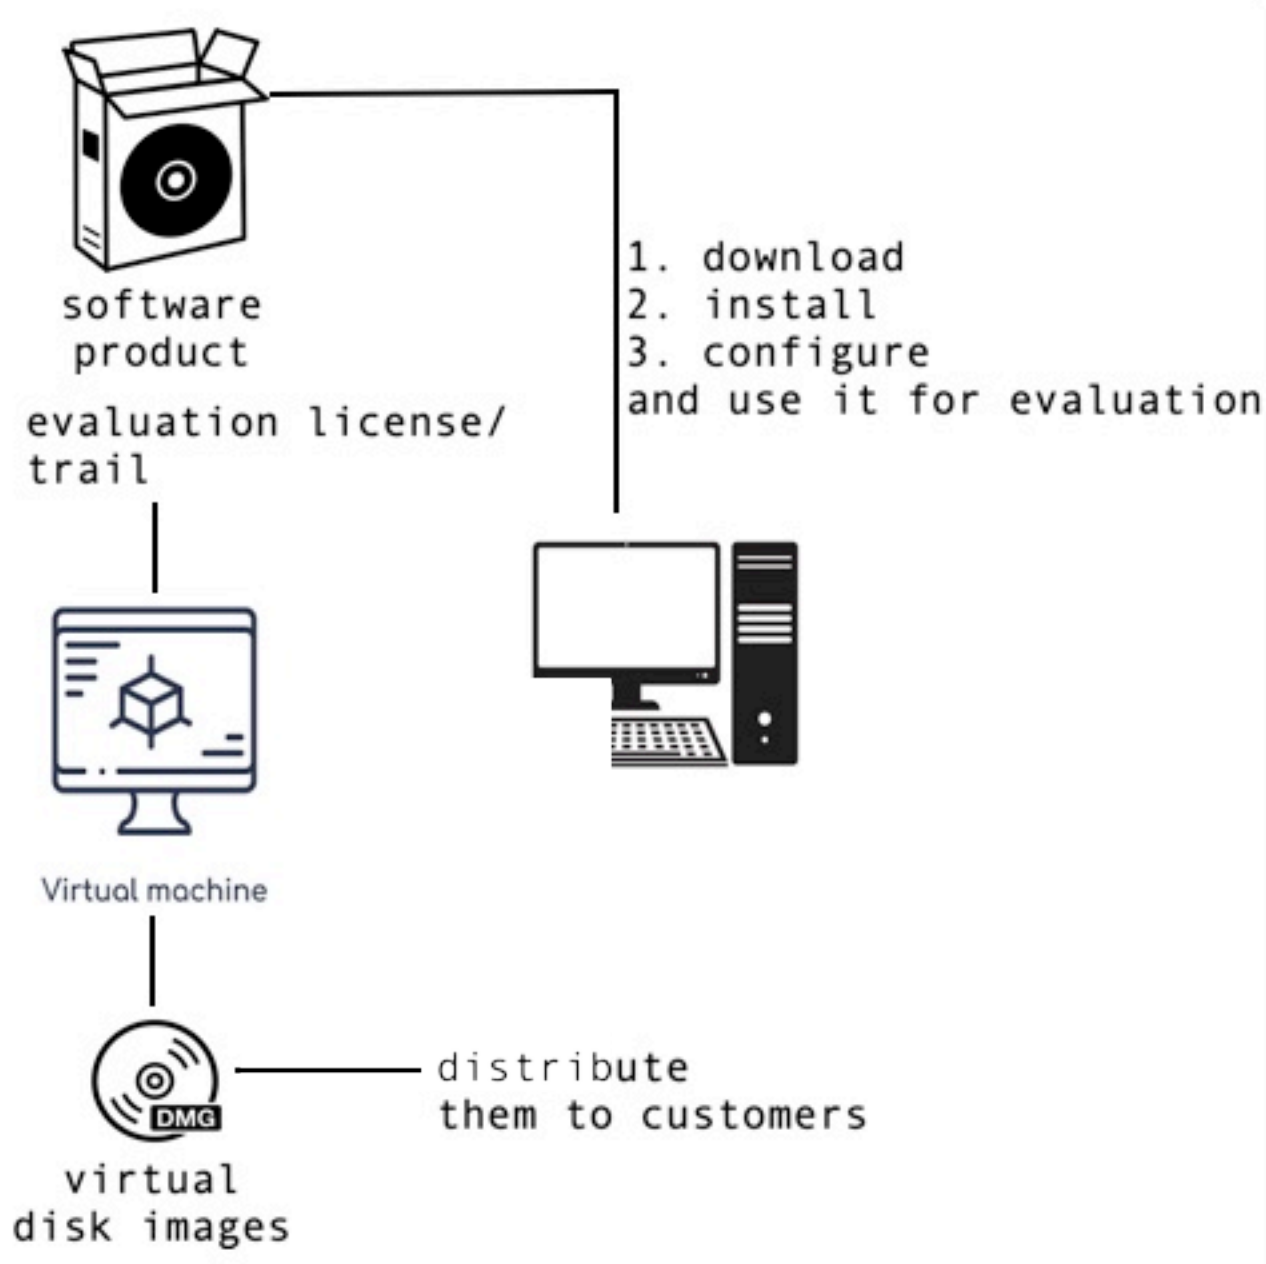

1. Database Softwares
- oracle

- db2

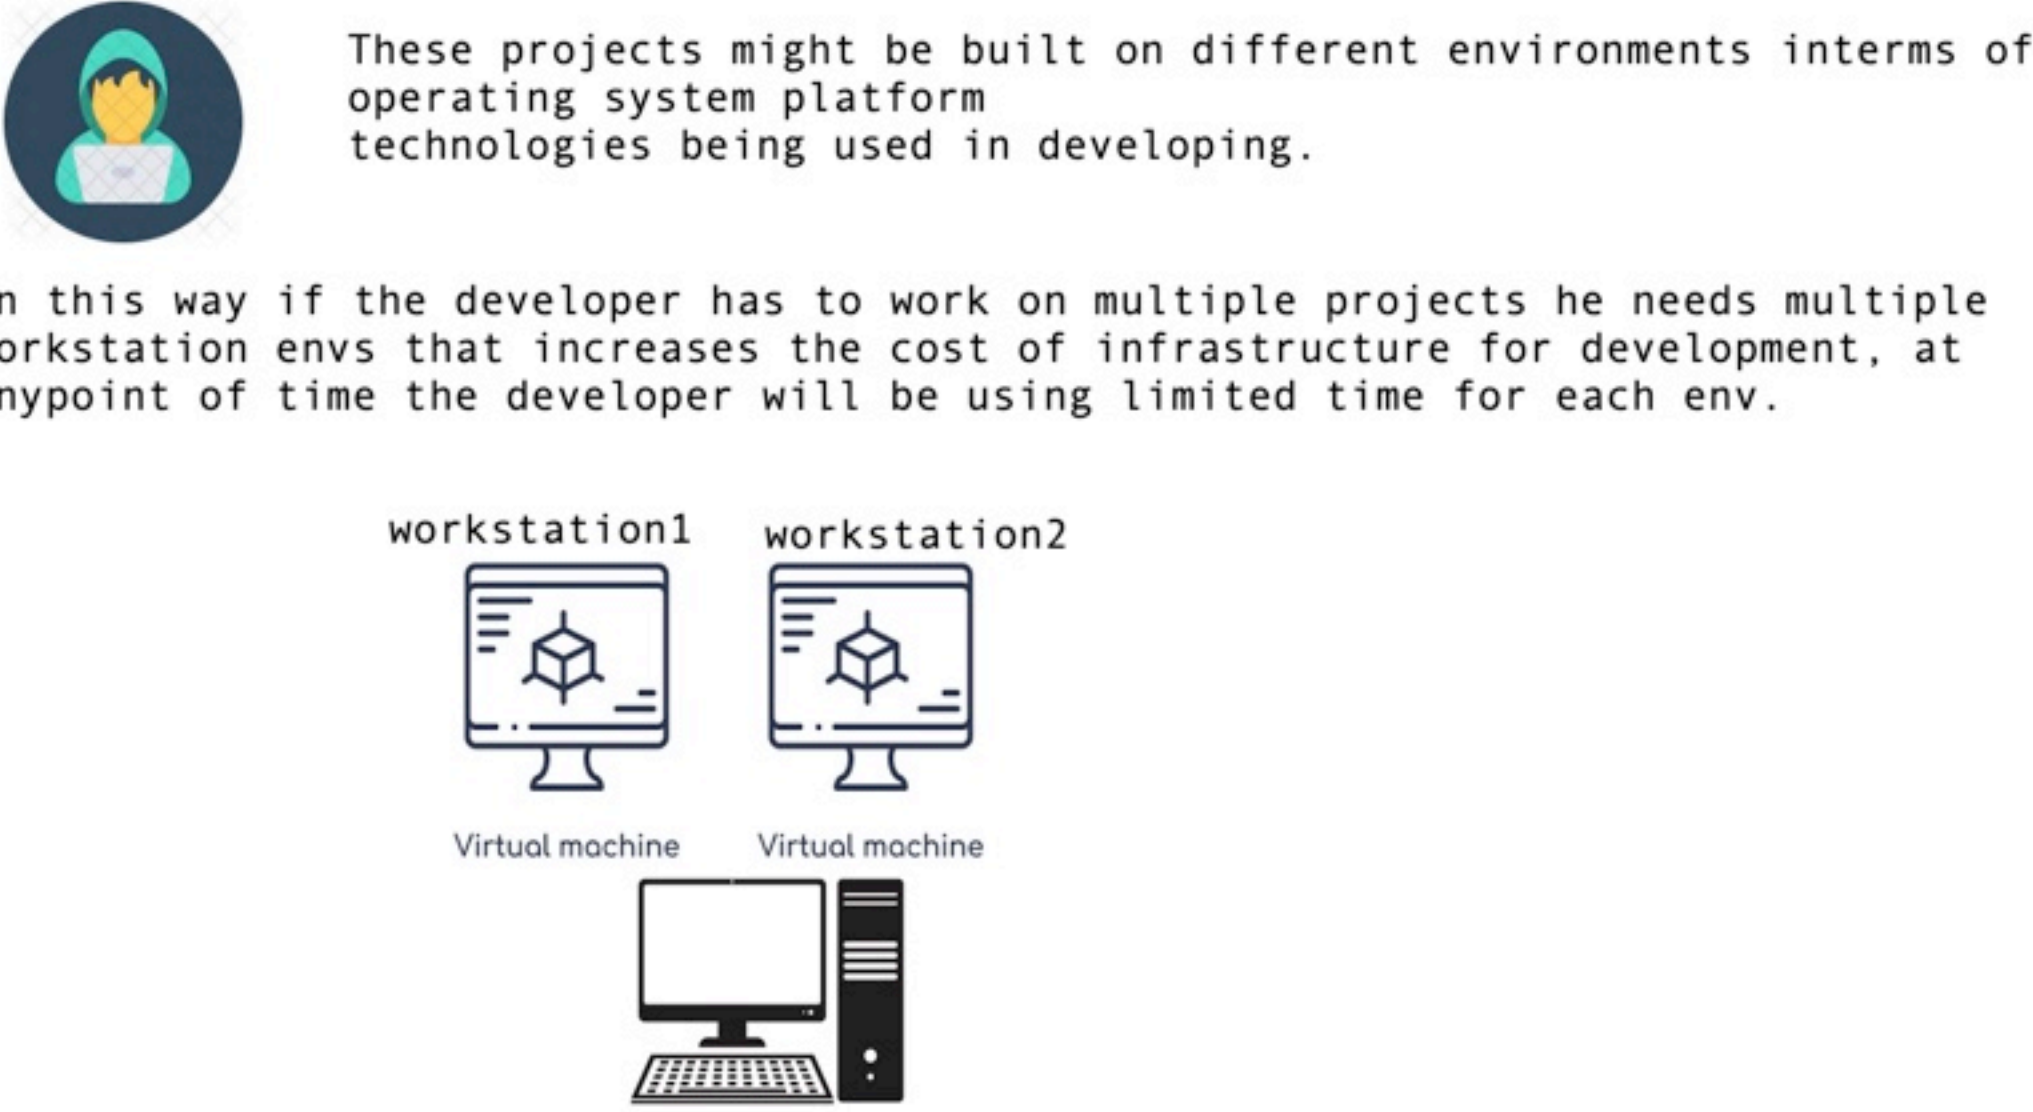

- mysql

- postgres
2. mongo
3. casendra
4. redisache
5. application server softwares
- weblogic

- websphere

3. Developer might be working on multiple projects

Containerization

Containerization is a technology through which we can package software application along with their dependent software packages and libraries together and can run them within a container isolated from other applications that are running on the environment.
